<p><b>When modelling UNNAMED locomotives of the LNER , it is very important to WORK FROM PHOTOGRAPHS ! This is because it is extremely difficult to be sure of exactly which Workplates were still on the locos during BR days. I believe that the above listings are correct, but if you want a different combination of plates in the set for your chosen model , please state clearly the exact plates required, and I will try to oblige.</b></p> <p><b>A considerable amount of research has gone into itemizing the workplates, but collectors will tell you that there are so many variations in their design that it is a virtual minefield for the unwary ! I am waiting for the publication of Part 2 of Yeadon's Tender Numbering Appendix before attempting Numberplates for the tender locomotives listed above ! In the meantime, I can always supply typical tender Numberplates, but they may not have been attached to the particular locomotive being modelled.</b></p>
